

# NA2X(F)K2Y

High Voltage Cables

## DESCRIPTION

The NA2X(F)K2Y high-voltage cable series is designed for industrial applications requiring robust electrical performance, featuring copper conductors and XLPE insulation suitable for voltage classes up to 110kV. Primarily used in power transmission and distribution networks.

## TECHNICAL DATA

Conductor	Insulation
Copper	XLPE
Sheath	Screen
PVC	Copper wire
Voltage rating	Standard
64/110 kV	IEC 60502-2
Conductor material	Insulation material
Copper	XLPE
