

NA2X(F)KLD2Y

High Voltage Cables

DESCRIPTION

The NA2X(F)KLD2Y high-voltage cable series is designed for industrial applications requiring high voltage class and robust performance, featuring copper conductors and XLPE insulation suitable for direct burial and cable tray installations.

TECHNICAL DATA

| | |
|--------------------|---------------------|
| Conductor | Insulation |
| Copper | XLPE |
| Sheath | Screen |
| PE | Copper wire + tape |
| Voltage rating | Standard |
| 64/110 kV | IEC 60502-2 |
| Conductor material | Insulation material |
| Copper | XLPE |
