

NA2XS(FL)2Y

High Voltage Cables

DESCRIPTION

The NA2XS(FL)2Y cable is a high-performance high-voltage cable with an aluminum conductor, XLPE insulation, and a waterproof PE sheath. It offers high operational reliability and is specifically designed for underground and demanding route installations.

TECHNICAL DATA

Conductor	Insulation
Aluminum	XLPE
Sheath	Screen
PE	Copper wire + tape
Water blocking	Conductor material
Yes	Aluminum
Conductor type	Insulation material
Compacted stranded	XLPE
